

# Jones Chiemela Egelle

Frontend Engineer

Lagos, Nigeria | +234 902-442-3438 | [egellejones@gmail.com](mailto:egellejones@gmail.com) | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

---

Frontend Engineer with 2+ years of professional experience translating designs into responsive, cross-browser web interfaces from initial mock-up through to production deployment. Skilled in HTML5, CSS3, and modern JavaScript/TypeScript, with hands-on back-end exposure through Node.js REST API integration and third-party API/auth work. Comfortable owning the full front-end delivery process markup, styling, componentisation, and cross-functional handoff with design and product teams and quick to pick up new tools and platforms as project requirements evolve.

## TECHNICAL SKILLS

---

- **Markup & Styling:** HTML5, CSS3 (responsive & adaptive design, cross-browser consistency), JavaScript (ES6+), TypeScript
- **Frameworks & Libraries:** React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Shadcn-UI, Material-UI, React-Bootstrap, Styled Components
- **Back-End & APIs:** Node.js REST API design, Appwrite (BaaS/NoSQL), GitHub OAuth & authentication flows, third-party API integration
- **Design-to-Code & Tooling:** Figma mock-up/prototype translation, Git & GitHub, Jest, Vite, Axios, code-splitting & lazy loading, performance optimisation
- **Process:** Agile delivery, cross-functional collaboration with design/product/creative teams, usability-focused development

## PROFESSIONAL WORK EXPERIENCE

---

### Phammer.

#### Frontend Engineer

Lagos, Nigeria

Sep 2025 – Jul 2026

- Engineered responsive, cross-browser UI components for a B2B marketplace, translating Figma mock-ups into production-ready interfaces on tight sprint timelines using React, Tailwind CSS, and Shadcn-UI.
- Implemented global state management with Redux Toolkit across cart, authentication, and UI flows, maintaining consistent design and branding standards across 10+ interconnected components.
- Integrated dynamic inventory and content APIs via Axios (back-end/API layer), introducing code-splitting and lazy loading to improve page load performance and usability for early-stage users.
- Collaborated directly with design and product teams on feature planning, interpreting and executing UI specifications ahead of platform launch.

### Neolartech LTD.

#### Frontend Developer

Remote

Feb 2024 – Present

- Developed performant React/Next.js components for a logistics web solution platform, improving load times and SEO.
- Integrated dynamic content APIs and implemented code-splitting and lazy loading to improve user engagement and performance.
- Translated Figma designs into responsive, reusable UI elements using Tailwind and Shadcn UI.
- Actively participated in Agile ceremonies, code reviews, and collaboration with cross-functional teams.

### Lithium Finance.

#### Frontend Engineer

Remote

May 2023 – Feb 2024

- Built and maintained the user-facing interface for a venture-backed DeFi protocol (\$5M raised, Pantera Capital), where UI accuracy and cross-device consistency were business-critical.
- Optimised client-side rendering using Next.js and TypeScript, improving load times and Core Web Vitals on a live, high-traffic platform.
- Contributed 9,000+ lines of production code via Git, maintaining consistent coding and documentation standards across a distributed team.

- Worked directly with engineering leads and business stakeholders to triage and ship UI fixes against structured delivery timelines.

**Seven Up Bottling Company**  
**IT Support Specialist (Intern)**

*Abia State, Nigeria*  
Mar 2022 – Sep 2022

- Diagnosed and resolved hardware, software, and network issues plant-wide, supporting daily operations during an active digital transformation programme.

**EDUCATION**

---

**Bachelor of Engineering in Computer Engineering (B.Eng).**  
Michael Okpara University of Agriculture, Umudike ·

2017 – 2024  
*Abia State, Nigeria*

**PROFESSIONAL DEVELOPMENT AND CERTIFICATION**

---

**TS Academy – Phoenix Cohort, Frontend Development Certification**

2026

Completed while employed full-time at Phammer: a structured, cohort-based certification undertaken to formally validate self-taught expertise, benchmark against current industry practices, and broaden exposure to team-based agile delivery workflows.
